Qin Dynasty (秦朝) is a period in Chinese history from 221 BC to 206 BC. The Qin's strength had been consolidated by Lord Shang Yang during the Warring States Period in the 4th century BC. In the early third century BC, the Qin accomplished a series of swift conquests: the state subjugated the Chu remnants of the Zhou Dynasty and various other states to gain undisputed control of China.

During its reign over China, the Qin Dynasty enjoyed increased trade, agriculture and military security. This was due to the abolition of land-owning lords, to whom peasants had formerly held allegiance. The central government now had direct control of the masses, giving it access to a much larger workforce. This allowed for the construction of ambitious projects, such as a wall on the northern border, now known as the Great Wall of China. The Qin Dynasty also introduced several reforms, weights and measures were standardized, use of currency started, and a better system of writing was established. An attempt to purge all traces of the old dynasties led to the infamous burning of books and burying of scholars incident, which has been criticized greatly by subsequent scholars. The Qin's military was also revolutionary in that it used the most recently developed weaponry, transportation, and tactics, though the government was heavy-handed and bureaucratic.

Han Dynasty (漢朝) is a period in Chinese history from 206 BC to 220 AD. It was the second Imperial Dynasty of China, preceded by the Qin Dynasty. It was founded by the peasant rebel leader Liu Bang, known posthumously as Emperor Gaozu of Han. It was briefly interrupted by the Xin Dynasty of the former regent, Wang Mang. This interregnum separates the Han into two periods: the Western Han (206 BC – 9 AD) and Eastern Han (25 AD –220 AD). Spanning over four centuries, the period of the Han Dynasty is considered a golden age in Chinese history. To this day, China's majority ethnic group refers to itself as the "Han people".

Emperor Wu (漢武帝) of Han (156 BC – 29 March, 87 BC), personal name Liu Che, was the seventh emperor of the Han Dynasty in modern day mainland China, ruling from 141 BC to 87 BC. Emperor Wu is best remembered for the vast territorial expansion that occurred under his reign, as well as the strong and centralized Confucian state he organized. He is cited in Chinese history as the greatest emperor of the Han dynasty and one of the greatest emperors in Chinese history. Emperor Wu's effective governance made the Han Dynasty one of the, if not the most powerful, nations in the world.

Bai Juyi (白居易) was a Chinese poet of the Tang dynasty. His poems mostly concern his responsibilities as governor of several small provinces. He is also renowned in Japan, where his name is read Hakkyoui. Bai Juyi was born in Xinzheng to a poor but scholarly family. At the age of ten, he was sent away from his family to avoid a war that broke out in Northern China, and went to live with relatives in the area known as JiangNan, more specifically XuZhou. He passed the jinshi (note from translator: something like a provincial test) in 800. His official career was initially successful: he was a member of the Hanlin Academy and Reminder of the Left from 807 until 815, when he was demoted and exiled after remonstrating with the Emperor Xian Zong over the failure to catch the murderer of two high officials. His career resumed when he was made Prefect of Hangzhou (822-824) and then Suzhou (825-827). His grave is situated on Xiangshan, across the Yi River from the Longmen cave temples in the vicinity of Luoyang, Henan.
